

CALADOC

Clone 724

Wine vine variety. Moderately vigorous. Caladoc N can likewise be used to make fruity and balanced rosé wines.

MORE INFO

Features

- Caladoc N is moderately vigorous.
- It can be short-pruned and trained in gobelet.
- The production is steady and it is not susceptible to shot berries.
- Caladoc N has good resistance to grey rot and is slightly susceptible to powdery mildew.

Technological potential

- The grape clusters are large and the berries are medium size.
- This variety produces very full-bodied wine with intense color and an interesting tannic structure (tannins are rather supple, with no bitterness yet very present).
- Caladoc N can likewise be used to make fruity and balanced rosé wines.
