

GWÜRZTRAMINER

Clone 47

In France, Gewurztraminer Rs is officially listed in the "Catalogue of vine varieties". This variety is likewise listed in the Catalogues of other European Union member states: Germany, Austria, Belgium, Bulgaria, Spain, Greece, Italy, Luxemburg, Netherands, Portugal, Czech Republic, Romania, Slovakia and Slovenia.

Features

- This vine variety is fairly vigorous, moderately productive and sensitive to shot berries; it must be long pruned. Gewurztraminer Rs is rather demanding with regard to terroir (preferably marly), and is needless to say sensitive to the chlorosis. It is likewise sensitive to black stem. This relatively early vine variety is sometimes affected by spring frost but resists well against winter frost.
- Gewurztraminer Rs is somewhat sensitive to downy mildew, grape vine moths and to grey rot.

MORE INFO

Technological potential

- The clusters and the berries are small. Gewurztraminer Rs has good sugar accumulation potential and in favorable terroirs, produces excellent quality wines, moderately acidic, medium bodied, generous wines with powerful and particular aromas (rose, litchis). These aromas tend to become heavier and less elegant in warm climatic zones.

-  To make wine
-  White grapevines
-  Seed
-  0 - 1300m
-  Early maturation
-  Low production
