

MUSCAT D'ALEXANDRIE

Clone 308

Originally from the Mediterranean region. Wine and table grape variety. This variety is well adapted to drought and to gravelly, acidic or decalcified terroirs. Muscat d'Alexandrie B can produce natural sweet wine with powerful, elegant and floral aromas.

MORE INFO

Features

- Muscat d'Alexandrie B is slightly vigorous with trailing growth. It is generally managed with short pruning and in gobelet. This variety is well adapted to drought and to gravelly, acidic or decalcified terroirs. Muscat d'Alexandrie B vines tend to age fairly quickly. Muscat d'Alexandrie B requires hot temperatures for the proper ripening of grapes and for lignification of the vine wood.
- Muscat d'Alexandrie B is sensitive to oidium, grey rot and to insects.

Technological potential

• The grape clusters are large and the berries very large. Muscat d'Alexandrie B can produce natural sweet wine with powerful, elegant and floral aromas. The sugar potential of this variety can only be expressed in climatic situations adapted to its particular needs. Muscat d'Alexandrie B can also be used to produce dry wines, possibly sparkling or used blended to provide aromatic input.
