

# DATTIER DE BEYROUTH

## Clone 966

Table grape variety. Grape maturity: period III. Vigorous variety with semi-erect to horizontal growth. Grape clusters are very large, loose or moderately compact.

MORE INFO

## Features

- Dattier de Beyrouth B is a vigorous variety with semi-erect to horizontal growth.
- It can be managed by short or long pruning but it must be carefully trained because the shoot base is fragile in the spring and the shoots are wind sensitive.
- Dattier de Beyrouth B is likewise susceptible to coulure and millerandage.
- Dattier de Beyrouth B is very susceptible to downy mildew and excoriosis. It is also susceptible to grey rot.

## Technological potential

- Grape clusters are very large, loose or moderately compact.
- The berries are very large with a thick skin and a simple flavor fleshy pulp. This variety has good storage and transportation capacity.
